Alphamatic

Backup as a Service:
The Smart Way to Protect Your Business Data

In an era where data is the backbone of business operations, safeguarding information. Whether on-premises or in the cloud is more critical than ever. **Alphamatic Systems** has addressed this need with their **AlphaCare Backup as a Service (BaaS)** solution, offering reliable, secure, and scalable data protection for businesses in Malaysia.

Affordable Pricing
Starting from RM 1,800 per year for 1 TB, we offer a cost-effective backup solution.

Trusted & Secure: Built on Best Practices

Alphamatic Systems follows the **3-2-1-1-0 backup rule**, ensuring multiple data protection layers using both cloud and on-prem elements via their robust **BOSSCloud** infrastructure.

Key Benefits Include:

End-to-End Encryption
All data is encrypted during transit and at rest, offering strong ransomware protection.

Real-Time Monitoring
Certified engineers continuously oversee backups for integrity and success.

Flexible Scheduling
Tailor backup frequency according to your operational needs.

Rapid Recovery
Swift restoration available from individual files to full systems.

Scalable Storage
Easy expansion as your storage needs grow.

Cost-Efficiency
No hardware costs or maintenance.

Design Options to Fit Your IT Strategy
We support two strategic design frameworks:

1 Comprehensive Design
Keeps one backup on-premises to enable faster local recovery in emergencies.

2 Cloud-Direct Design
Minimizes on-site infrastructure by storing backups entirely in BOSSCloud, which still fulfills compliance, validation, and redundancy requirements.

Microsoft 365 Backup Support

Recognizing the limitations of Microsoft's default retention policies, we extends its BaaS to include comprehensive **backup for Exchange Online, OneDrive, Teams**, and more! Ensuring your cloud collaboration tools stay protected beyond standard retention windows.

—

Recovery Tailored to You

Our certified engineers handle all recovery scenarios. We offer optional **self-service recovery**, allowing users to restore data themselves quickly and safely.

Secure your business data with
AlphaCare Backup as a Service – local, flexible, and recovery-ready.
