

# What is **DRaaS** (Disaster Recovery as a Service)?

Unexpected disruptions, whether from cyberattacks, system failures, or natural disasters. Can bring business operations to a halt. That's where **Disaster Recovery as a Service (DRaaS)** comes in. It's a cloud-based solution that ensures your critical systems and data are always protected and recoverable, keeping downtime to a minimum.

**DRaaS** is a managed cloud service that replicates your IT infrastructure, applications, and data to a secure offsite environment. In the event of a disruption, operations can quickly "failover" to this environment, ensuring business continuity. Once your primary systems are restored, you can easily switch back.

## Why DRaaS Matters for Businesses

- ✓ **Minimize Downtime** – Get your systems back up fast, reducing revenue loss.
- ✓ **Cost-Effective** – Avoid heavy investments in backup data centers.
- ✓ **Scalable** – Adapt disaster recovery resources as your business grows.
- ✓ **Compliance Ready** – Meet industry and regulatory standards.
- ✓ **Peace of Mind** – Managed by experts, so your IT team can focus on growth.

## DRaaS vs Backup as a Service (BaaS)

While **Backup as a Service (BaaS)** secures your files and data, **DRaaS** goes further by replicating your entire IT environment. This means your applications, servers, and workflows can continue running seamlessly during an outage.

## How DRaaS Works

- 1 Assessment** – Identify critical systems and set recovery objectives.
- 2 Replication** – Copy data and infrastructure to a secure offsite cloud.
- 3 Failover** – Switch to the DR environment during downtime.
- 4 Failback** – Restore operations to your primary systems once recovered.
- 5 Testing** – Regular DR drills to ensure readiness and compliance.

## Strengthen Your Business Continuity with Us

At Alphamatic Systems, we provide fully managed Disaster Recovery as a Service (DRaaS) to help enterprises safeguard their operations, reduce downtime, and stay compliant.

- ✓ Enterprise-grade protection
- ✓ Faster recovery times (RTO/RPO)
- ✓ Managed by cloud and security experts
- ✓ 99% uptime assurance
- ✓ 24/7 monitoring and support

**Ready to safeguard your business against downtime?**
