

What is AlphaCare Ransomware Rapid Recovery (R³)?

AlphaCare Ransomware Rapid Recovery (R³) is a proactive ransomware protection and recovery service designed to help businesses **prepare for, respond to, and recover from ransomware attacks.**

Think of R³ as an **insurance plan for your IT operations** — it helps your business stay prepared before an attack happens and provides the right recovery strategy, processes, and expert support when an incident occurs.

Unlike traditional backup solutions that only focus on data restoration, R³ focuses on **business readiness and rapid recovery** to help minimize downtime and operational disruption.

With **R³**, businesses can:

- ✓ **Prepare before an attack** with a structured Incident Response Plan (IRP)
- ⚡ **Respond faster** with a clear and guided recovery process
- 👥 **Recover with confidence** through expert recovery support and proven processes
- 🔄 **Restore critical operations quickly** to reduce downtime and business impact

R³ helps businesses move from **reacting to ransomware attacks** to being **ready to recover when it matters most.**

Recover Your Business in Hours, NOT Weeks

Ransomware can bring business operations to a complete stop. Every minute of downtime can result in financial losses, delayed operations, and customer impact.

With R³, your business has a structured recovery approach in place, helping you restore critical systems faster and avoid making recovery decisions under pressure.

- ✓ Minimize downtime and financial impact
- ✓ Follow a tested recovery process during critical incidents
- ✓ Resume business operations faster after ransomware attacks
