Limited to the first 10 customers ONLY!

Terms and conditions apply.

POWERED BY

motadata PATCH MANAGEMENT

Simplify patch management with centralized visibility and deployment capabilities.

MOTADATA provides IT management software with patch management capabilities that help organizations manage software updates across supported devices.

Key Benefits

Centralized Patch Visibility

Identify missing patches and review patch status across enrolled devices.

Simplified Patch Deployment

Schedule and coordinate software updates to reduce repetitive manual work.

Prioritized Remediation

Help IT teams focus on important security patches and outstanding updates.

Improved Reporting

Maintain patch status records and exception reports to support IT governance.

Why MANAGEPLUS?

More than a patch management tool, ManagePlus combines MOTADATA technology with Alphamatic's managed service delivery.

Structured Quarterly Patching

Four planned patch management cycles per year, coordinated around agreed maintenance windows.

Critical Patches Prioritized

Target deployment within a maximum of five working days, subject to customer approvals, maintenance windows and service conditions.

Managed by Alphamatic

Get support with patch planning, deployment coordination, exception tracking and service reporting.

Reduced IT Workload

Reduce the administrative burden on your internal IT team while maintaining a more structured patch management process.

READY TO STRENGTHEN YOUR PATCH MANAGEMENT?

Move beyond ad-hoc patching with a structured, managed approach to patch visibility and remediation.

Contact us to arrange a Vulnerability & Patch Management Assessment.
